40%	40%	40%	40%	Yes
50%	50%	50%	50%	No

*All cost share amounts shown for the HSA-qualified plans below are after deductible.

How to get covered drugs and supplies at retail pharmacies

Members may fill prescriptions at a retail Kaiser Permanente pharmacy or a retail MedImpact pharmacy. Cost shares will be the same whether members use a Kaiser Permanente or MedImpact pharmacy. For questions about pharmacy benefits, call Customer Service at 1-866-616-0047.

Kaiser Permanente pharmacies are located in most Kaiser Permanente medical offices. To find a Kaiser Permanente pharmacy, please visit kp.org/choiceproducts/nw, or contact Customer Service at **1-866-616-0047**.

MedImpact pharmacies are located across the United States. Contact MedImpact customer service at **1-800-788-2949** for information on finding a MedImpact pharmacy or visit kp.org/nw/medimpact.

When a prescription is purchased from a retail Kaiser Permanente pharmacy or a retail MedImpact pharmacy, members pay the cost share on the benefit summary for up to a 30-day supply. This applies for each prescription. If charges for the drug or supply are less than the cost share, the member pays the lesser amount.

Mail-order pharmacy

Kaiser Permanente mail-order: We offer postage-paid delivery to addresses in Oregon and Washington. Receive up to a 90-day supply for 2 copays. Some drugs and supplies are not available through our mail-order pharmacy, for example, controlled substances as determined by state and/or federal regulations, drugs that require special handling or are affected by temperature, or drugs that are high cost. If you would like to use our mail-order pharmacy, call **1-800-548-9809**, or order online at kp.org/refill.

MedImpact mail-order: Use the CVS Caremark mail-order pharmacy to have prescriptions mailed to a home address. Shipping is free. Call CVS Caremark at **1-800-841-5550** or visit caremark.com.

Not all drugs are available through mail order. Examples of drugs that cannot be mailed include controlled substances as determined by state and/or federal regulations, drugs that require special handling, and drugs affected by temperature.

New members — getting started (Kaiser Permanente pharmacies only)

For existing prescriptions, new members can complete the online Transfer Your Prescriptions form at kp.org/newmember or call the New Member Welcome Desk at **1-888-491-1124**. We will work with the previous pharmacy to transfer medications, coordinate refills, and answer questions. Kaiser Permanente has a formulary list of medications covered under the prescription benefit. If a medication is not on the formulary, one of our pharmacists will work with the member and their health care team to update the medication to a formulary product. Our health care team uses our formulary to help determine the safest, most effective prescriptions.

Formulary information (Kaiser Permanente pharmacies only)

Our drug formulary is a list of drugs that our Regional Formulary and Therapeutics Committee has approved for our members. The Regional Formulary and Therapeutics Committee chooses drugs for the formulary based on a number of factors, including safety and effectiveness as determined from a review of the scientific literature.

We may add or remove drugs from the formulary. If we remove a drug from the formulary, members will need to switch to another comparable drug that is on the drug formulary. Drugs on our formulary may move to a different drug tier during the year. For example, a drug could move from the non-preferred brand drug list to the preferred brand drug list. If we move a drug that a member is taking to a different drug tier, this could change the cost share amount for that drug.

To see if a drug or supply is on our drug formulary, or to find out what drug tier the drug is in, go online to **kp.org/formulary**. Members may also call our Formulary Application Services Team (FAST) at **503-261-7900** or toll free at **1-888-572-7231**. For a copy of our drug formulary or information about the formulary exception process, please call Customer Service. The presence of a drug on our drug formulary does not necessarily mean that providers will prescribe it for a particular medical condition.

Diabetic supplies

The following nonprescription items are covered for the treatment of diabetes: glucagon emergency kits, insulin, ketone test strips for urine testing, blood glucose test strips, and disposable needles and syringes. Additional diabetic equipment and supplies may be covered under durable medical equipment (DME) and prosthetics and orthotics benefits.

Prescription drug exclusions (this is only a partial list of exclusions)

- Any special packaging, other than the dispensing pharmacy's standard packaging.
- Brand-name drugs for which a generic drug is available, unless approved.
- Drugs, biological products, and devices that the FDA has not approved.
- Drugs used for the treatment of infertility.
- Drugs used for the treatment or prevention of sexual dysfunction disorders.
- Drugs used in weight management.
- Drugs use to enhance athletic performance.
- Nutritional supplements.
