

2026 Traditional, Deductible, and HDHP prescription drugs

This benefit covers outpatient prescription drugs and supplies prescribed by a participating provider or any licensed dentist and obtained at a participating pharmacy, including our mail-order pharmacy. Drug formulary guidelines apply.

*All cost share amounts shown above for the HSA-qualified plans are after deductible.

This is not a contract. This benefit summary does not fully describe your benefit coverage with Kaiser Foundation Health Plan of the Northwest. Please see your *Evidence of Coverage (EOC)* for complete details of benefits as well as exclusions and limitations. In the event of a conflict between this summary and the *EOC*, the *EOC* will control.

How to get covered drugs and supplies

Participating pharmacies are located in many Kaiser Permanente participating facilities. To find a participating pharmacy, please see the *Medical Facility Directory*, visit **kp.org**, or contact Member Services.

When a prescription is purchased from a participating pharmacy, members pay the cost share shown above for up to a 30-day supply. This applies for each prescription. If charges for the drug or supply are less than the cost share, the member pays the lesser amount.

Mail-order pharmacy

We offer postage-paid delivery to addresses in Oregon and Southwest Washington. When prescriptions are filled through the Kaiser Permanente mail-order pharmacy, you may be eligible for a reduced cost share. For plans that have a copay, you may receive up to a 90-day supply for 2 copays. For HSA-qualified high deductible plans that have a single tier coinsurance (i.e. 10%, 20%, 30%, 40%, or 50%), you may receive up to a 90-day supply with a cost share reduction of up to 10%. Some drugs and supplies are not available through our mail-order pharmacy, for example, controlled substances as determined by state and/or federal regulations, drugs that require special handling or are affected by temperature, or drugs that are high cost. To use our mail-order pharmacy, members can call **1-800-548-9809**, or order online at **kp.org/refill**.

New members — getting started

For existing prescriptions, new members can complete the online Transfer Your Prescriptions form at **kp.org/newmember** or call the New Member Welcome Desk at **1-888-491-1124**. We will work with the previous pharmacy to transfer medications, coordinate refills, and answer questions. Kaiser Permanente has a formulary list of medications covered under the prescription benefit. If a medication is not on the formulary, one of our pharmacists will work with the member and their health care team to update the medication to a formulary product. Our health care team uses our formulary to help determine the safest, most effective prescriptions.

Formulary information

Our drug formulary is a list of drugs that our Regional Formulary and Therapeutics Committee has approved for our members. The Regional Formulary and Therapeutics Committee chooses drugs for the formulary based on a number of factors, including safety and effectiveness as determined from a review of the scientific literature.

We may add drugs to the formulary or remove drugs from it. If we remove a drug from the formulary, the member will need to switch to another comparable drug that is on the drug formulary. Drugs on our formulary may move to a different drug tier during the year. For example, a drug could move from the non-preferred brand drug list to the preferred brand drug list. If we move a drug that a member is taking to a different drug tier, this could change the cost share amount for that drug.

To see if a drug or supply is on our drug formulary or to find out what drug tier the drug is in, go online to **kp.org/formulary**. Members may also call our Formulary Application Services Team (FAST) at **503-261-7900** or toll-free at **1-888-572-7231**. For a copy of our drug formulary or information about the formulary exception process, please call Member Services. The presence of a drug on our drug formulary does not necessarily mean that providers will prescribe it for a particular medical condition.

Diabetic supplies

The following nonprescription items are covered for the treatment of diabetes: glucagon emergency kits, insulin, ketone test strips for urine testing, blood glucose test strips, and disposable needles and syringes. Additional diabetic equipment and supplies may be covered under durable medical equipment (DME) and prosthetics and orthotics benefits.

Weight loss drugs

Weight loss drugs are automatically excluded from all pharmacy plans. Weight loss drug riders are available for buy-up. Cost shares are based on the pharmacy tier that the rider falls under (i.e., generic, brand, preferred etc.) OR at a 50% coinsurance (deductible where it applies).

Prescription drug exclusions (this is only a partial list of exclusions)

- Any special packaging, other than the dispensing pharmacy's standard packaging.
- Brand-name drugs for which a generic drug is available, unless approved.
- Drugs, biological products, and devices that the FDA has not approved.
- Drugs used for the treatment of fertility.
- Drugs used for the treatment or prevention of sexual dysfunction disorders.
- Drugs used in weight management.
- Drugs use to enhance athletic performance.
- Nutritional supplements.
