

2026 Washington Added Choice® Point of Service Fertility Treatment (includes Assisted Reproductive Technology services)

Kaiser Permanente's medical benefits cover diagnostic services for fertility for all members and include consultation and evaluation of fertility status, diagnostic imaging and laboratory tests, as well as other medically necessary diagnostic services to determine if there is an underlying medical condition that may affect fertility.

This rider provides additional coverage for fertility treatment services related to conception by artificial means, including artificial insemination, in vitro fertilization (IVF), gamete intrafallopian transfer (GIFT), and zygote intrafallopian transfer (ZIFT). We also have a prescription drug rider available for coverage of oral and injectable drugs used in fertility treatments. Some fertility treatment services, and fertility drugs require prior authorization to be covered.

Recommended Benefit Maximum Combinations

The total lifetime benefit maximum must be split between medical and pharmacy services. Due to Washington state's Essential Health Benefits (EHB), artificial insemination does NOT apply to the total lifetime benefit maximum. The portion of the benefit maximum that applies to medical and the portion that applies to pharmacy are combined to equal the total lifetime benefit maximum. Medical and pharmacy benefit maximums do not cross-accumulate. Here are some example combinations:

Total Lifetime Maximum	Medical Services Maximum	Pharmacy Services Maximum
\$15,000	\$10,000	\$5,000
\$20,000	\$15,000	\$5,000
\$25,000	\$15,000	\$10,000
\$30,000	\$20,000	\$10,000
\$35,000	\$20,000	\$15,000
